2.02 Create a Frame-by-Frame Animation Using PowerPoint Activity

Directions: Perform the steps below to make a frame-by-frame animation using Microsoft Power Point or a similar presentation software package.

- Step 1: Open the presentation software.
- Step 2: Choose a vector clip art image that can be ungrouped.
- Step 3: Insert the clip art onto the first slide. Ungroup it.
- Step 4: The image will need to be converted to a Microsoft Drawing Object. Click Yes when prompted to do so.
- Step 5: Ungroup the new image. All the different layers or parts of the image will now be selected. Click outside the image to deselect the parts. Click on the piece that you want to change.
- Step 6: Add or delete pieces of the image.
- Step 7: Copy the changed clip art and paste it onto the second slide. Change the image again.
- Step 8: Repeat step 4 until the desired number of frames have been created.
- Step 9: Set amount of time for each frame to display.
- Step 10: Set up the show to run continuously.
- Step 11: Save and preview the animation.
